**Commercial & Industrial Thermostat Program**

**Purpose**

The Commercial & Industrial Thermostat Program is an energy efficiency initiative designed to encourage commercial and industrial members to reduce energy usage by upgrading to self-learning thermostats.

**Availability**

This program is available to non-residential members within all territories served by Inter-County Energy.

**Eligibility**

Members are eligible for this program if they have a ducted air-source air conditioner or heat pump with a capacity of 2 tons or greater, controlled by a single thermostat that is non-self-learning. An incentive is available for each single-zone system where a self-learning thermostat is installed. Zoned systems are not eligible for this incentive.

Notwithstanding the forgoing, a landlord who rents to a tenant who is a member of Inter-County Energy shall also be eligible to participate in the Commercial & Industrial Thermostat Program regardless of whether said landlord is also a member of Inter-County Energy. A landlord may be eligible for the same number of incentives per calendar year as a metered tenant member.

**Verification Procedure**

To qualify for the incentive, existing non-self-learning thermostats must be identified or documented by EKPC or Inter-County Energy staff before the retrofit. After the member completes the retrofit, EKPC or Inter-County Energy staff must verify the installation of thermostat.

**Payment**

For each qualifying thermostat that is replaced with a self-learning thermostat, the member will receive an incentive of \$100.
