

Inter-County Energy's ROW Maintenance Program

Recommended Right-of-way Maintenance of Electric Utility Lines

Inter County Energy makes sure our Right of-way Program is followed each year. This year will be no exception as our vegetation maintenance inspector has identified areas within our service territory where trees will have to be removed or trimmed to help improve your quality of service by reducing power outages and blinks.

A representative from Inter-County Energy will make an attempt to contact those members where we must do some trimming and/or removal of trees. If no one is home, a door hanger will be left with contact information so you may call and request to speak with a Right of-way representative.

If you have immediate questions or concerns regarding property access, trimming or removal of trees. You may contact us at 1-888-266-7322.
